Glass touch wall switches:
The style meets the functionality

Touch@glass are simple, intuitive, elegant and variable.

Glass touch wall switches sharply expand the line of control devices in your home, apartment, hotel or office. The main advantage of these glass switches is variability and possibility of using customer graphic design.

With our switches you can fulfill your deepest ideas. Thanks to user simplicity they are suitable to hotels, office buildings, conference rooms etc.
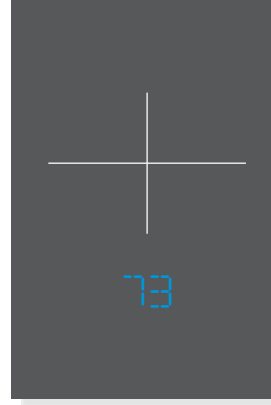

In standard design these wall switches contain temperature metering and indicating via LED lights.
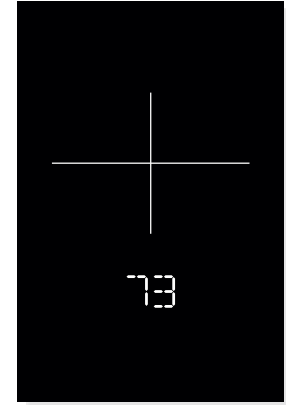

US design

- 4 single touch surfaces
- backlight LED
- temperature sensor
- humidity sensor
- integrated logic thermostat
- dimensions: 120x80x4 mm
